

Are you compliant?

Do your Patient Treatment Areas comply with the electrical safety requirements set out in Australian Standards AS/NZS 3003?

This Includes: Dentists, Physiotherapy, Nursing Homes, Imaging Practices, Day Surgery, Chiropractic Rooms, CT Rooms, Hospital/Doctor Patient Examination Rooms

Did you know?...

Australian Standards recommend all existing non-compliant Patient Treatment Areas be upgraded to either Body Protected or Cardiac Protected Areas as necessary.

These Patient Treatment Areas are required to be inspected for electrical safety and compliance every 12 months.

If the Patient Treatment Areas within your practice are not compliant, you could be paying expensive insurance premiums for cover that may be declined when you need it.

Ensure your staff and patients are protected.

Call TechSafe to receive a 30% Discount off your 1st Electrical Safety Inspection and for advice to clarify your requirements.
